Data Engineer experienced in building scalable ETL pipelines and cloud-based data systems. Skilled in Python, SQL, Airflow, and AWS, with proven impact in optimizing data workflows and processing large-scale datasets across healthcare and enterprise domains.

PROFESSIONAL EXPERIENCE

Data Engineer, Ltimindtree	12/2023 – present
- Designed and implemented scalable ETL and data pipelines for global clients including UNICEF and Marriott International, and government healthcare projects. - Migrated 10M+ records using Python and Airflow; improved performance by 40% and reduced transformation time by 30–40%. - Worked on healthcare data systems under National Health Mission, implementing HL7 and Ayushman Bharat Digital Mission (ABDM) standards. - Developed and optimized complex Apache Airflow DAGs to orchestrate large-scale ELT workflows and AWS S3-to-Snowflake data pipelines, implementing parallelization, dynamic configurations, data quality checks that improved data throughput by 25% for critical pipelines. - Developed serverless ETL pipelines using AWS Lambda and services including S3, Glue, Redshift, DynamoDB, and SNS. - Processed large-scale datasets using PySpark, Hive, and Hadoop for batch and distributed data workloads and Airflow for batch and streaming workflows.	

SKILLS

Languages — Python, SQL, JavaScript, PySpark • **Database** — PostgreSQL, MySQL, MSSQL, MongoDB, Redis • **Data Engineering** — ETL/ELT, Data Pipelines, Data Migration, Data Modeling, Apache Airflow, Apache Spark, Hadoop, Hive • **Cloud & Warehousing** — AWS (S3, Glue, Lambda, Redshift, DynamoDB), Snowflake • **Tools & DevOps** — On-Prem, CI/CD, Linux, Git, Docker, Linux, Shell Scripting

PROJECTS

Capstone Project – Sports Analytics Platform (AWS)
- Built a scalable AWS-based data analytics platform for sports performance analysis using EC2, Glue, and Redshift. - Performed data cleaning and transformation with Python (Pandas) and automated metadata management using AWS Glue Crawlers. - Designed analytical queries in Amazon Redshift and created dashboards in QuickSight for actionable insights.

ACHIEVEMENTS

Second Runner Up: Sparkathon - Hackathon, NMIMS University Navi Mumbai	03/2021
First Runner Up: HackOverflow, NIT Meghalaya	10/2021
Human Emotion Recognition Using Convolutional Neural Networks (CNN), Published Research Paper – ResearchGate	01/06/2024

EDUCATION

Bachelor of Engineering - Information Technology, Terna Engineering College - 8.74/10	2019 – 2023
HSC, St Lawrence Junior College, Thane - 66.92%	2017 – 2019
SSC, R.J Thakur School, Thane - 73.8%	2017

TRAININGS AND CERTIFICATIONS

AWS Certified Cloud Practitioner 📄, Amazon Web Services (AWS)
Data Engineering, LTIMindtree 📄 Engaged in a comprehensive program focused on rigorous training in data science and data engineering with diverse range of technologies, including AWS services, Snowflake, Python, Pandas, NumPy, SQL, NoSQL, Hadoop, PySpark, Power BI, and proficiency in cloud platforms and DevOps technologies such as Docker, Azure and AWS along with version control systems.
